

Ever since a young age, I have had an aspiration for art. I have found myself to be the more creative one compared to my two brothers. I have recently been expanding my outlook on art by exploring Adobe programs. I also have been getting into photography and learning more and more everyday about it. When I draw or create something, I tend to strive for a more realistic look rather than abstract. As I grow as an artist, I hope to gain more knowledge on different ways of making and looking at art. During my time at Finger Lakes Community College, I have become much more efficient with Adobe programs like, Photoshop and Illustrator. As time goes on, I hope to improve on the skills I already have obtained during my lifetime.
